9 DEC 1964

Dear Jack,

25X1X7

I have been now further thinking on the agenda for a [redacted] meeting on missile production and I would like to offer the attached as a substitute.

I think we should start with a discussion of facilities and methodology in order to form a framework for our discussions on estimates. A review of the facility information as a distinct entity is called for because of the nature of the information. Very few of the facilities can be directly associated with a particular system, and, therefore, review of the facilities related to each of the various systems would probably become redundant. Secondly, I think that the [redacted] information on the relevant facilities is so good that it deserves a rather comprehensive exchange of interpretative views. This is particularly true of the test facilities on which I think we should discuss function, timing and place in the Soviet program.

25X1D3a

In discussing estimates for each missile system, I would prefer to start with the M-14R because one of the methodologies is founded on an analysis of the R-12M program and the Tuesday morning session would seem to logically flow into that system.

I put this agenda as a suggestion only. I think it necessary that the listed subjects be treated separately but I am not wedded to the order in which we attack them, nor to the
